

# ADIL WADU

## ABOUT ME

While working as a pharmacist for 7 years, I was exposed to software development from social network which really drew my attention to. After teaching myself some basic programming languages from Udemy, I became passionate about coding. So, I decided to take on a new degree on computer science at Uopeople, alongside with full-stack code camp which I aimed at accelerating web development skills. I successfully built my own full-stack web app from scratch, starting from designing to deploying. I learned a lot during building the projects especially finding solutions, making decisions, and solving different problems,

## SKILLS

- HTML, CSS, JavaScript, jQuery
- React, Material UI
- PHP
- NodeJS, Express
- MySQL, Sequelize
- Firebase

## EXPERIENCE

### Software engineer at Sippop (Dec 2022 - present)

- Adding new features on existing projects.
- Collaborate with the team to understand requirement and business.

### Personal Projects

- **Tell your pharmacist**  
A full-stack telepharmacy web application that helps patients consult with pharmacists and as assistant to pharmacy store for dispensing drug to their patients and managing stocks. It's built with react and Material UI from the front-end, express JS on the back-end, Sequelize ORM, MySQL and firebase for data persistence. I also utilize a few APIs such as Google map and Stripe in this app.
- **Quizhub**  
An app that provides quizzes to test our knowledge of different categories and difficulties. The app is built by pulling an external quiz API via http request and populated features into UI components.
